APPENDIX A: Risk Register Template & Treatment Action Plan Template

1. Statement of Commitment

The major risk for most organisations is that they fail to achieve their strategic business or project objectives or are perceived to have failed by their stakeholders. Hope Vale Aboriginal Shire Council is committed to establishing an environment that is not unduly risk averse, but one that enables risks to be logically and systematically identified, analysed, evaluated, treated, monitored and managed. Risk is inherent in all of Council's activities and a formal and systematic process has been adopted to minimise and where possible eliminate all risks that directly or indirectly impact on the Council's ability to achieve the vision and strategic objectives outlined in the Corporate Plan.

These Risk Management Framework and Guidelines have been developed to demonstrate the Council's commitment, by detailing the integrated Risk Management framework to be employed by all staff members, contractors, committees and volunteers engaged in Council business and defining the responsibilities of individuals and committees involved in managing risk.

In addition, the guidelines have been developed to:

- Ensure risk management is an integral part of strategic planning, management and day to day activities of the organisation;
- Promote a robust risk management culture within the Council;
- Enable threats and opportunities that face the organisation to be identified and appropriately managed;
- Facilitate continual improvement and enhancement of Council's processes and systems;
- Improve planning processes by enabling the key focus of the organisation to remain on core business and service delivery;
- Encourage ongoing promotion and awareness of risk management throughout Council.

2. Introduction

In order for Council to deliver the strategies and achieve the objectives as outlined in the Corporate Plan, Council needs to identify and manage risks. Risk is an event or action, which has the potential to prevent Hope Vale Aboriginal Shire Council from achieving its corporate objectives. A risk can also be defined as an opportunity that is not being maximised by the Council to meet its objectives.

Enterprise Risk Management (ERM) is the management of risk not only in conventional hazard categories such as health and safety, IT, finance, but in the full spectrum of strategic and operational risk. ERM is the structured approach of aligning strategy, processes, people, technology and knowledge with the purpose of evaluating and managing risk. *Enterprise wide* means the removal of traditional functional, divisional, departmental or cultural barriers. Importantly, having a structured approach provides guidance to managing existing and perceived risks that potentially impact on the organisation's ability to fulfil its business objectives.

Effective risk management is governed by an organisation's commitment to risk management and this process is outlined in Hope Vale Aboriginal Shire Council's Risk Management Framework and Guidelines which is in line with the Australian Standard AS ISO 31000:2018 Risk Management – Guidelines.

3. Definitions

Risk: Risk is defined by the Australian Standard for Risk Management as “effect of uncertainty on objectives”. An effect is a deviation from the expected. It can be positive, negative or both, and can address, create or result in opportunities and threats. Objectives can have different aspects and categories and can be applied at different levels. Risk is usually expressed in terms of *risk sources*, *potential events*, their *consequences* and their *likelihood*.

Risk Management: Risk management for Council refers to the culture, processes and structures developed to effectively manage potential opportunities and adverse effects for any activity, function or process undertaken by the Council. Managing risk is achieved through the systematic application of policies, procedures and practices to identify, analyse, evaluate, treat, monitor and communicate risk.

Enterprise Risk Management (ERM): Enterprise risk management encompasses all the major risk categories (including financial, environmental, health and safety, fraud, information technology, compliance, security and business continuity) and includes the coordination, integration, consolidation and consistency of reporting by the various Council functions with identified risks.

Risk Register: A list of identified and assessed risks directly related to either a particular department of council, a project, or to the whole of Council. Risk Registers can either be Corporate, Operational, or project based.

Likelihood: The word likelihood is used to refer to the chance of something happening, whether defined, measured or determined objectively or subjectively (probability or frequency).

Consequence: The outcome of an event affecting objectives (impact). An event can lead to a range of consequences. A consequence can be certain or uncertain and can have a positive or negative effect on objectives. Consequences can be expressed qualitatively or quantitatively.

Risk Owner: The person with the accountability and authority to manage a risk.

Risk Treatment: The process to modify existing risks or create new risks.

Risk Treatment Action Plans: The document that outlines the steps to be taken to reduce unacceptable risks to achievable and acceptable levels. This includes details on current controls; required risk treatments; improvement opportunities; resources; timing; reporting and accountabilities.

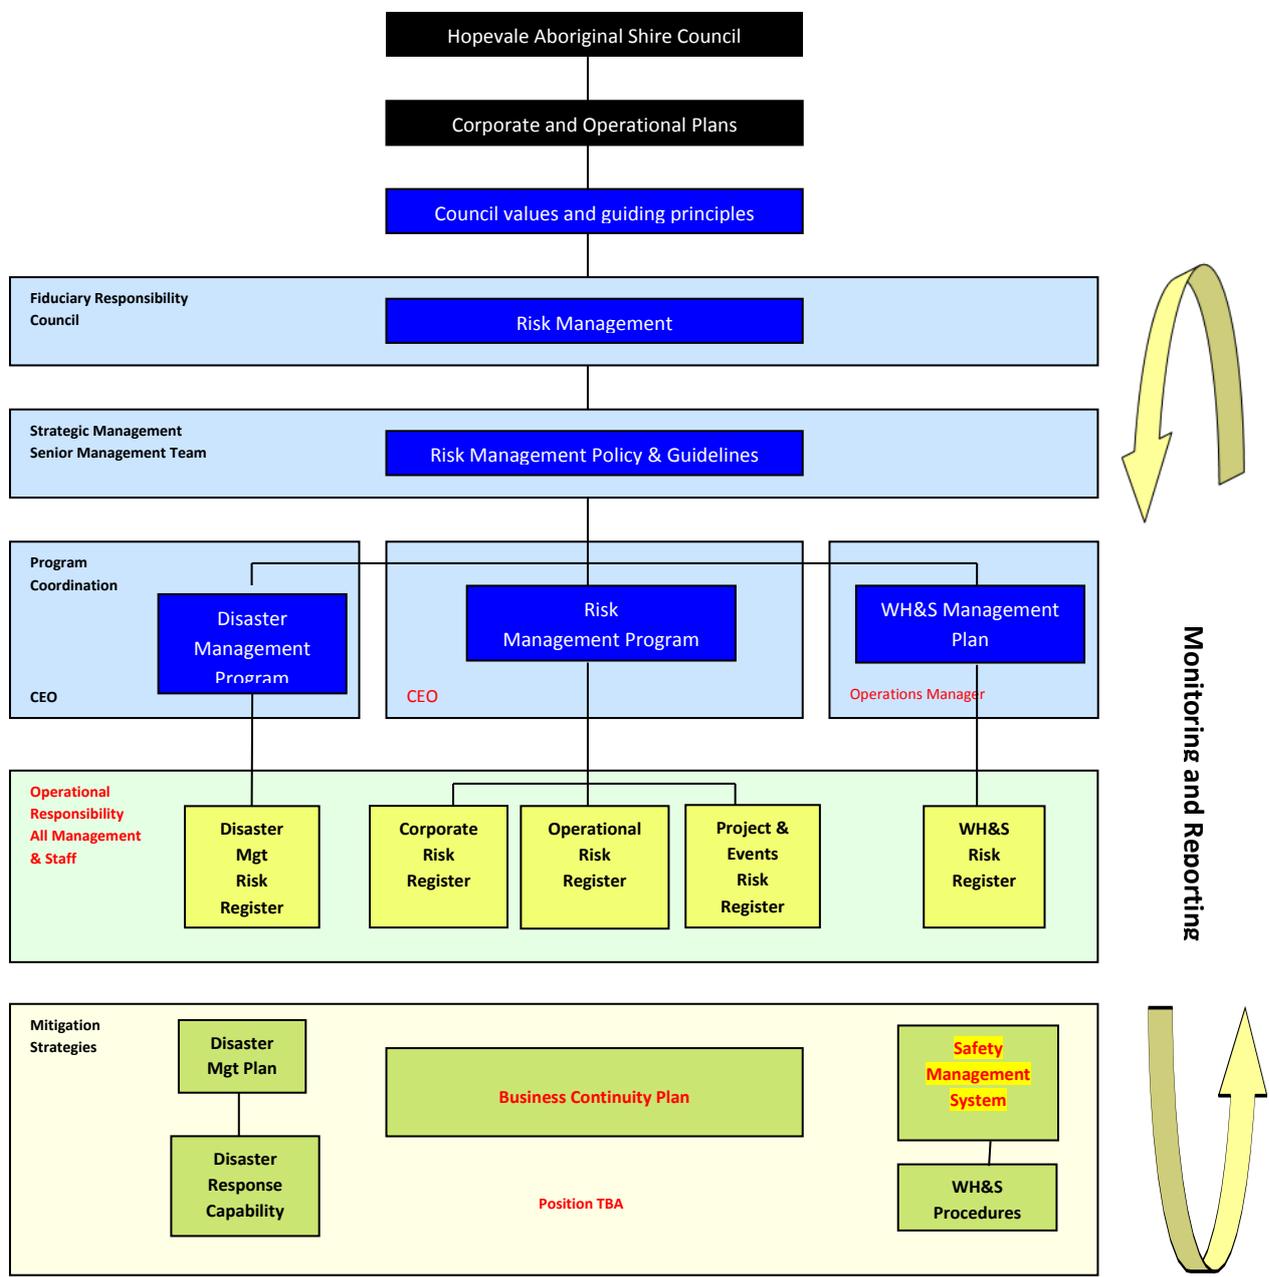

4. Risk Management Principles

For risk management to be effective, an organisation should comply with the following principles.

Risk Management:

- a) **Integrated** – Risk management is an integral part of all organisational activities
- b) **Structured and comprehensive** – A structured and comprehensive approach to risk management contributes to consistent and comparable results
- c) **Customised** – The risk management framework and process are customised and proportionate to the organisation’s external and internal context related to its objectives

- d) **Inclusive** – Appropriate and timely involvement of stakeholders enables their knowledge, views and perceptions to be considered. This results in improved awareness and informed risk management.
- e) **Dynamic** – Risks can emerge, change or disappear as an organisation’s external and internal context changes. Risk management anticipates, detects, acknowledges and responds to those changes and events in an appropriate and timely manner.
- f) **Best available information** – The inputs to risk management are based on historical and current information, as well as on future expectations. Risk management explicitly takes into account any limitations and uncertainties associated with such information and expectations. Information should be timely, clear and available to relevant stakeholders.
- g) **Human and cultural factors** – Human behaviour and culture significantly influence all aspects of risk management at each level and stage.
- h) **Continual improvement** – Risk management is continually improved through learning and experience.

5. Risk Management Framework

The Risk Management Framework explains the relationship between the Council's risk management components and other management systems and frameworks.

6. Basis, Roles and Responsibilities

Please refer to Council's Risk Management Policy.

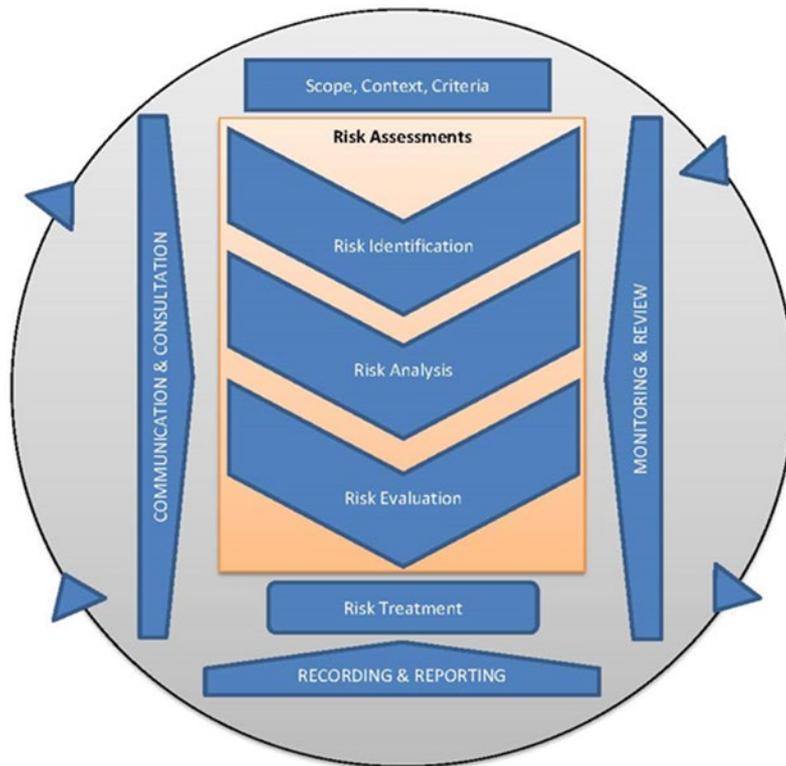

7. Risk Management Process

The process adopted by Hope Vale Aboriginal Shire Council to manage risks is in accordance with AS ISO 31000:2018 Risk Management – Guidelines. This process is the application of the structured risk management methodology to be used to assess; prioritise; treat and monitor risks identified. The risk management process may capture inherent risk (prior to considering controls in place), residual risk (after taking into account controls in place), or both.

The main elements of an effective Risk Management approach are as follows:

- Communicate and Consult
- Establish the Context
- Risk Assessment
 - Identify Risks
 - Analyse Risks
 - Evaluate Risks
- Treat Risks
- Monitor and Review

The following diagram represents the components of the Risk Management process. Each of these components is explained further below.

Source: Australian Standard ISO 31000:2018 Risk Management – Guidelines

7.1 Communicate and Consult

It is an essential part of the risk management process to develop and implement an effective framework to communicate and consult with all relevant stakeholders, internal and external as appropriate, at each stage of the risk management process and concerning the process as a whole. The level of communication and consultation will vary depending on the level of interest and or influence of that particular stakeholder individual or group.

7.2 Establish the Context

Stage one of the processes establishes the strategic, organisational and risk management context in which the rest of the process will take place. This includes the criteria, against which risk will be evaluated, the risk appetite of the organisation and corrective actions for the different rating achieved in the assessment of the risks.

In establishing the context for the Risk Management Framework, existing risk management processes were reviewed, interviews and workshops were held with key personnel and a Risk Management Policy was developed. (Refer to Risk Management Policy).

7.3 Risk Assessment

7.3.1 Identify Risks

At this stage, the organisation identifies what, why and how things can arise, that may affect the organisation, as the basis for further analysis. This is carried out at both strategic and operational levels of the organisation.

Categories of risk for the organisation at a strategic and operational level may include, but are not limited to:

- **Safety** – injuries, lost time, Workcover & LGM claims, fatalities

- **Reputation and image** – negative media exposure, staff morale, community perception
- **Assets** – damage or loss of information, property or assets
- **Environment** – impact or harm to natural environment, potential for future damages claims and DES prosecution
- **Service Delivery** – ability to service community and meet customer expectations
- **Regulatory** – breaches of legislation (“ignorance is no excuse”)
- **Management effort** – senior management effort directed away from achieving strategic objectives and impacting on overall performance (i.e. focused on day to day tasks)

7.3.2 Analyse Risks

This stage determines the inherent risks and then calculates any residual risks taking into consideration any existing controls in place (existing processes and procedures). Risks are analysed in terms of consequence and likelihood in the context of those controls. The analysis will consider the range of potential risk exposure consequences and how likely those consequences are to occur. The Consequence and Likelihood are then combined to produce an estimated level of risk known as the Overall Risk Rating.

Determining Likelihood

In determining the **likelihood** of each risk, the following ratings and definitions have been applied. In making your assessment you must remember that some events happen once in a lifetime, other can happen almost every day. Judgment is required to determine the possibility and frequency that the specific risk is likely to occur.

Likelihood Table

Rating	Description	Definition - Likelihood of Occurrence
1	Rare	Event may occur once in every 10+ years
2	Unlikely	Event may occur in every 5 – 10 years
3	Possible	Event may occur once in every 2 – 5 years
4	Likely	Event may occur once in every 1 – 2 years
5	Almost Certain	Event may occur within one year

Determining Consequence

In determining the consequence of each risk, the following ratings and definitions have been applied. There are five levels used to determine consequence and when considering how risks may impact on the organisation it is also important to think about the non-financial elements as well.

Consequence Table

Description	Qualitative Definition - Consequence
Insignificant	An event, that impact can be absorbed; no injuries; low financial loss
Minor	An event, the consequences of which can be absorbed but management effort is required to minimise the impact; First aid treatment; low-medium financial loss
Moderate	A significant event which can be managed under normal circumstances; medical treatment; medium financial loss
Major	A critical event, which with proper management can be continued; extensive injuries; loss of production capability; major financial loss
Catastrophic	A disaster which could lead to the collapse of the organisation; death; huge financial loss

Quantitative parameters have been developed (Refer Consequence Matrix) to enable the organisation to consistently assign consequence ratings to potential risks. These quantitative measures assign the organisation's risk tolerance parameters applicable to each of the five consequence levels. This approach ensures that all staff can rate the consequence of a risk occurring against the organisation's established parameters, instead of their own personal choice.

Consequence Matrix

Consequence	Rating	Operational – Business Continuity	Environmental	Information Technology	Strategic/Corporate Governance – Reputation - Political	Human Resources	Infrastructure, Asset & Property	Workplace Health & Safety	Financial and Economic
Catastrophic	5	The continuing failure of Council to deliver essential services The removal of key revenue generation	Widespread and irreversible environmental damage attributed by the courts to be negligent or incompetent actions of Hope Vale Shire Council.	Widespread, long term loss of IT network/hardware.	Loss of State Government support with scathing criticism and removal of the council. National media exposure Loss of power and influence restricting decision making and capabilities	Staff issues cause continuing failure to deliver essential services	Widespread, long term loss of substantial key assets and infrastructure.	Fatality or significant irreversible disability.	Above 6% of Council's annual revenue (excluding capital revenue) = \$ 1M
Major	4	Widespread failure to deliver several major strategic objectives and service plans. Long-term failure of Council causing lengthy service interruption	Severe environmental impact requiring significant remedial action. Penalties and/or direction or compliance order incurred.	Widespread, short to medium term loss of IT network/hardware	State media and public concern/exposure with adverse attention and long-term loss of support from Example Shire residents. Adverse impact and intervention by State Government	Staff issues cause widespread failure to deliver several major strategic objectives and long term failure of day to day service delivery.	Widespread, short to medium term loss of key assets and infrastructure.	Extensive injuries. Lost time of more than 4 working days.	Between 2-6% of Council's annual revenue (excluding capital revenue) =\$500,000

Consequence	Rating	Operational – Business Continuity	Environmental	Information Technology	Strategic/Corporate Governance – Reputation - Political	Human Resources	Infrastructure, Asset & Property	Workplace Health & Safety	Financial and Economic
Moderate	3	Failure to deliver minor strategic objectives and service plans. Temporary & recoverable failure of Council causing intermittent service interruption for a week.	Moderate impact on the environment; no long term or irreversible damage. May incur cautionary notice or infringement notice	Short to medium term loss of key IT network/hardware	Significant state wide concern/ exposure and short to mid term loss of support from Example Shire residents. Adverse impact and intervention by another local government & LGAQ.	Staff issues cause failure to deliver minor strategic objectives and temporary and recoverable failure of day to day service delivery.	Short to medium term loss of key assets and infrastructure	Medical treatment. Lost time of up to 4 working days.	Between 1-2% of Council's annual revenue (excluding capital revenue) = \$250,000
Minor	2	Temporary and recoverable failure of council causing intermittent service interruption for several days.	Minor environmental damage such as remote temporary pollution.	Minor loss/damage. Repairs required	Minor local community concern manageable through good public relations. Adverse impact by another local government.	Staff issues cause several days interruption of day to day service delivery	Minor loss/damage. Repairs required	First aid treatment. No lost time.	Between 0.2 - 1% of Council's annual revenue (excluding capital revenue) = \$100,000
Insignificant	1	Negligible impact of Council, brief service interruption for several hours to a day.	Brief, non-hazardous, transient pollution or damage.	Damage where repairs are required however equipment still operational	Transient matter, e.g. Customer complaint, resolved in day-to-day management. Negligible impact from another local government.	Staff issues cause negligible impact of day to day service delivery	Damage where repairs are required however facility or infrastructure is still operational	No injury.	Less than 0.2 % of Council's annual revenue (excluding capital revenue) = \$5,000

Determining the overall Risk rating

After the **consequence** and **likelihood** ratings have been determined they are combined in a matrix to determine the overall risk rating for each risk. The extent of the consequences and the extent of the likelihood risks will be assessed in a range from **Low** to **Extreme**.

The table below illustrates how the combination of the consequence and likelihood generates the overall risk rating.

Risk Assessment Matrix

Likelihood	Rating	Consequence				
		1	2	3	4	5
		Insignificant	Minor	Moderate	Major	Catastrophic
Almost certain	5	M (5)	H (10)	H (15)	E (20)	E (25)
Likely	4	M (4)	M (8)	H (12)	H (16)	E (20)
Possible	3	L (3)	M (6)	H (9)	H (12)	H (15)
Unlikely	2	L (2)	L (4)	M (8)	M (8)	H (10)
Rare	1	L (1)	L (2)	L (3)	M (4)	H (5)

7.3.3 Evaluate Risks

Risks need to be evaluated and prioritised to ensure that management effort is directed towards resolution of the most significant organisational risks first. The initial step in this Risk Evaluation stage is to determine the effectiveness, and or existence of, controls in place to address the identified risks.

The following table will assist to determine the effectiveness, and or existence of, controls in place to address the identified risks.

Control Assessment	Description
Adequate	<ul style="list-style-type: none"> The controls address the identified risk and there is little scope for improvement. There is no convincing cost/benefit justification to change the approach.
Opportunities for Improvement	<ul style="list-style-type: none"> The controls contain some inadequacies and scope for improvement can be identified. There is some cost/benefit justification to change the approach.
Inadequate	<ul style="list-style-type: none"> The controls do not appropriately address the identified risk and there is an immediate need for improvement actions. There is a significant cost/benefit justification to change the approach.

7.3.4 Risk Register

A Risk Register is developed to record and assess each risk identified as part of the risk identification stage.

The application of the stages of the risk assessment process noted above ensure there is consistency in the determination of the current risk severity level, taking into account the existing controls and their level of effectiveness in mitigating or addressing the risk. Refer to Appendix B for a Risk Register Template.

Risk Profile diagram

At the completion of the assessment process, a risk profile diagram will be developed to highlight each of the risks identified and their overall risk rating.

The risk profile diagram (example below) will highlight to CEO and senior executive the key risk exposures within the organisation. The risks will be categorised as **Extreme, High, Medium and Low** to assist management to target those risks that have the greatest potential impact on the organisation.

The approach for treatment of risks is:

LIKELIHOOD	CONSEQUENCES				
	Negligible / Insignificant	Low / Minor	Medium / Moderate	Very high / Major	Extreme / Critical
Rare	LOW Consider accepting the risk or routine management	LOW Consider accepting the risk or routine management	LOW Consider accepting the risk or routine management	MEDIUM Specify responsibility and action	HIGH Quarterly senior management review
Unlikely	LOW Consider accepting the risk or routine management	LOW Consider accepting the risk or routine management	MEDIUM Specify responsibility and action	MEDIUM Specify responsibility and action	HIGH Quarterly senior management review
Possible	LOW Consider accepting the risk or routine management	MEDIUM Specify responsibility and action	MEDIUM Specify responsibility and action	HIGH Quarterly senior management review	HIGH Quarterly senior management review
Likely	MEDIUM Specify responsibility and action	MEDIUM Specify responsibility and action	HIGH Quarterly senior management review	HIGH Quarterly senior management review	EXTREME Monthly senior management review
Almost Certain	MEDIUM Specify responsibility and action	MEDIUM Specify responsibility and action	HIGH Quarterly senior management review	EXTREME Monthly senior management review	EXTREME Monthly senior management review

7.4 Treatment of Risks

After evaluating each risk and appropriate controls, it is the responsibility of the manager to implement the suitable treatment. Treatment needs to be appropriate to the significance and priority of the residual risk. As a general guide:

- **Retain the risk** – where the risk cannot be avoided, reduced, or transferred. In such cases, usually the likelihood and consequence are low. These risks should be monitored and determined how losses, if they occur, will be funded.
- **Transfer the risk** – involves shifting all or part of the responsibility to another party who is best able to control it (such as an insurer who bears the consequence of losses e.g. Insure Council vehicles).
- **Avoid the risk** – Decide not to proceed with the policy, program or activity or choose an alternative means of action.
- **Control the risk** – By either reducing the likelihood of occurrence or the consequences e.g. Implement procedures for specified tasks.
- **Remove** – the risk source.
- **Take or pursue the risk** – where a risk presents an opportunity a decision may be taken to enhance, accept, work with or pursue the risk.

Determine the most effective treatment options by considering the:

- Cost/benefit of each option including the cost of implementation (do not consider financial considerations only; organisational, political, social and environmental factors should also be considered)
- Use of proven risk controls
- The anticipated level of risk remaining after implementation of risk treatment. The final acceptance of this risk will be a matter for the appropriate Director or CEO to decide.

Once treatment options for individual risks have been selected, they should be assembled into action plans: risk treatment plans or strategies. The outcome of an effective risk treatment plan is knowledge of the risks Council can tolerate and a system that minimises those risks that it cannot tolerate.

The decision to accept a risk will be determined by the agreed table indicating proposed corrective action and the risk appetite criteria established by the council. For example, a LOW risk is accepted and only requires monitoring should circumstances change. For other risks, a specific management plan may be required to be developed and implemented which may include consideration of funding. Risk treatment strategies need to also be considered to ensure that no new risks are introduced.

7.5 Monitor and Review

This stage establishes a process to monitor and review the performance of the risk management system implemented and changes that might affect the performance or give rise to new risks that will require assessment.

Both monitoring and reviewing should be a planned part of the risk management process and tailored to the needs of the organisation and the significance of the risks identified. It should be undertaken on at least an annual basis.

The continual process of monitoring and reviewing is required to ensure ongoing effective risk treatments and the continual improvement of the risk management standards.

- **Monitoring** – assess whether current risk management objectives are being achieved. Council can use inspections, incident reports, self-assessments, and audits to monitor its risk management plan.
- **Review** – assess whether the current risk management plan still matches Hope Vale Aboriginal Shire Council’s risk profile. The risk management plan may be reviewed by studying incident patterns, legislative changes, and organisational activities.

Possible methods for review:

- Internal check program/audit or independent external audit;
- External scrutiny (appeal tribunal, courts, commission of inquiry);
- Physical inspection;
- Program evaluation; and Reviews of organisational policies, strategies and processes.

When completing the review process, it is important the context in which the original risk was developed is reassessed. The review should also be informed by reports and recent events and include consideration of:

- Completeness of the register;
- Continued existence of controls;
- Adequacy of controls;
- Risk ratings;
- Treatment strategies;
- Risk owner; and
- Risk review date.

8. Recording the Risk Management Process

Each stage of the Risk Management process must be recorded appropriately. All Risk Assessments and Risk Treatment Action Plans must be documented, retained and easily accessible for future reference. Even if a risk is assessed to be Low and a decision is taken to do nothing, the reasoning that led to the decision must be recorded. In complying with the Local Government Regulation 2012, section 164, we are required to keep written records of:

- A) The risks
- B) The control measures

9. Reviewing the Risk Management Framework and Guidelines

To ensure that the risk management process is effective and continues to support the organisation’s performance, all aspects of the risk management process will be periodically reviewed.

The Risk Management Framework and Guidelines, Risk Management Policy and Risk Registers will be reviewed on a regular basis to ensure that they are still appropriate and continue to reflect the organisation's risk activities and tolerances.

Based on the results of monitoring and reviews, decisions will be made on how the Risk Management Framework can be improved. These improvements should lead to improvements in the management of risk and the risk management culture.

The Operational Risk Management Committee will review Council's performance in identifying and treating operational risks (including disaster management & WH&S) on a quarterly basis.

The internal auditors through the Audit Committee will also undertake periodic reviews of council's performance.

10. Communication

The Risk Management Framework and Guidelines, Risk Management Policy, Risk Registers and associated documents and procedures will be held in a secure central repository and will be accessible to stakeholders according to their authority levels.

The existence, nature and location of the central repository will be shared with staff at all levels to encourage their awareness of how the organisation is managing its risks.

Following reviews of the Framework and Guidelines as specified any changes will be communicated to the relevant Risk Owners and other stakeholders to ensure that the Enterprise Risk Management process remains dynamic and relevant.

Risk Management Action Plan NOTE: Electronic template in Excel available.

Risk ID No	Description	Risk Event <i>What might happen?</i>	Source of Risk <i>How might the risk arise?</i>	Likelihood <i>How likely is it to occur?</i>	Consequence <i>What will be the outcome?</i>	Risk Score <i>Likelihood x consequences</i>	Risk Treatment <i>What can be done to avoid the risk, control, transfer or finance the risk?</i>	Controls Assessment	Resources Required <i>What physical, human, or financial resources required</i>	Residual Risk Consequences	Residual Risk Likelihood	Residual Risk Rating	Performance Measure <i>How will you know the risk treatment is working?</i>	Time Line	Responsibility <i>Name and position</i>
